

# Houzz Call: Show Us Your Newly Renovated Kitchen

Just finished a kitchen revamp? Use this space to show off what you've done and inspire other renovators along the way

**Vanessa Walker** April 7, 2017

Houzz Australia & New Zealand Editor. I work on house and garden stories all day...

At any one time in our reno-mad nation, tens of thousands of people are doing up their kitchens: increasing the area's functionality, introducing new materials and colour schemes and, in some cases, entirely new ways of living. Many hopes and dreams are poured into our renovations, so if yours has turned out to be just what you imagined (or even better), here's an opportunity to show off what you've accomplished. Simply upload a photo or two to the Comments section and explain what you did and why you love it. Adding photos is easy – and it just might earn you some well-deserved pats on the back from fellow Houzzers.

## Take your best shot

Take a photograph or two that shows off your kitchen to its best advantage. Try to make it as light and appealing as possible.

## Show it off

Be sure to capture all the best aspects of your new kitchen: be it pendant lights, splashback, choice of cabinetry, bar stools you splashed out on, or simply its clever configuration...

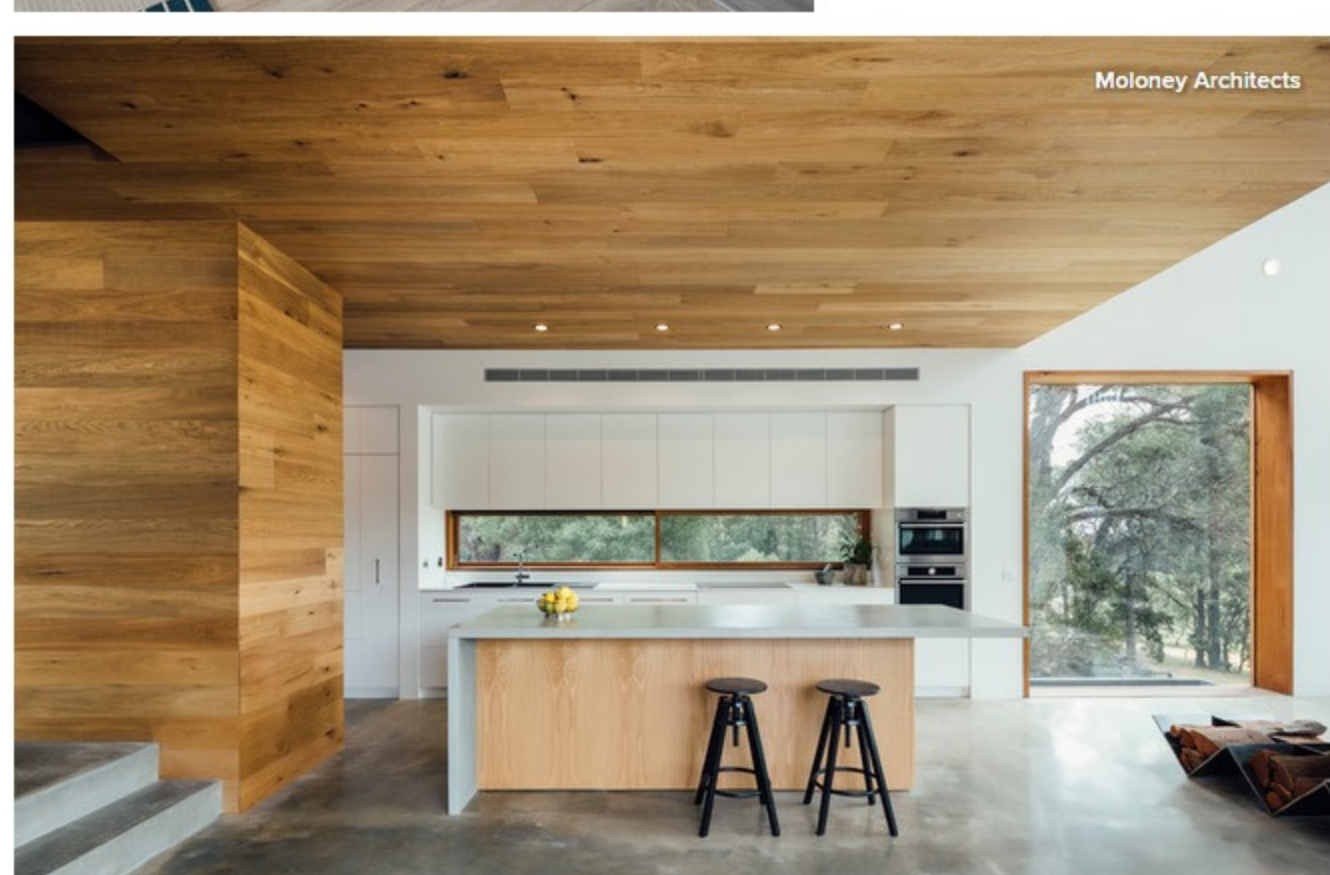

## No matter the style

Whether it's industrial, traditional, eclectic, modern, Scandi – or defies categorisation – we'd love to see it.

Because renovating isn't always easy, we want to celebrate what you've achieved.

Did you know... in its Kitchens and Bathrooms Past Growth and Future Prospects report, Housing Industry Australia noted that about 145,000 kitchens were renovated in 2016?

And it doesn't have to be as beautiful and professionally shot as these photos. Let's keep it real.

## Tell us about your space

Note down why you love your renovated kitchen and any special features you feel add value to the space... There are lots of Houzzers out there waiting to be inspired by you and wanting to applaud you...

So get involved by posting one or two photos and your thoughts in the Comments section below. We can't wait to see what you've accomplished.
